Event Details:

Event	**Tornado**
-- Scale	**F1**
-- Length	**.7 Miles**
-- Width	**20 Yards**
State	**COLORADO**
County/Area	**MONTROSE**
WFO	**GJT**
Report Source	**LAW ENFORCEMENT**
NCEI Data Source	**PDS**
Begin Date	**2004-05-13 08:30 MST**
Begin Location	**1ESE MAHER**
Begin Lat/Lon	**38.65/-107.56667**
End Date	**2004-05-13 08:35 MST**
End Location	**1ESE MAHER**
End Lat/Lon	**38.65/-107.55**
Deaths Direct/Indirect	**0/0** (fatality details below, when available...)
Injuries Direct/Indirect	**0/0**
Property Damage	**2K**
Crop Damage	
Episode Narrative	**A tornado touched down near the Clear Fork Road and traveled east southeast across forested land and a large meadow. Pinyon trees with trunks up to 14 inches in diameter were ripped out by the roots or snapped off at the base. Some of the trees were lifted over 200 feet into the sky and found about a half mile away from the tornado path. As the tornado lifted, it struck a barn and tore off a large part of the roof and some side panels. Part of a corral and sections of fence were also damaged. The remaining funnel cloud continued moving east southeast for another 7 minutes before dissipating. The tornado was observed by at least a dozen eyewitnesses, including a professional photographer who took snapshots of the funnel cloud as it passed overhead.**

Event Map:

Note: The tornado track is approximate based on the beginning (B) and ending (E) locations. The actual tornado path may differ from a straight line.
